THE ORIGINAL!

Trelawny's "B" and "BPG" ranges of needle and chisel scalers have for many years been the default choice for companies seeking reliable, productive descaling tools.

Proven in the harshest environments on ships and rigs throughout the world the B/BPG series comprises a range of sizes and configurations to suit many surface preparation tasks.

Dust control options available
See page 72 for our full range of vacuums

Non spark options available

FEATURES & BENEFITS

- Range of sizes for performance and versatility
- Pistol grip and in-line configurations
- Range of needles and consumables
- Optional Beryllium copper needles for use in potentially explosive environments.
- Ergonomic design for operator comfort
- Simple maintenance with no special tools
- Available as a needle or chisel scaler for multiple applications

APPLICATIONS

- Removal of coatings, corrosion and other accumulated materials
- Slag removal and stress relieving welds
- Cleaning concrete prior to repair
- Cleaning mixers, formwork and machinery

NEEDLES - A MARK OF EXCELLENCE FROM TRELAWNY

Trelawny offer the highest quality needle proven to last more than 10 times the duration of some competitor needles. Our customers benefit from less needle changes and therefore reduced downtime.

All the Trelawny Needle Scalers are delivered from stock complete with 180mm long x 3mm diameter chisel tipped high performance needles. Other needle holders are available as accessories for use with 2mm and 4mm diameter needles. We also offer spark resistant needles for use in potentially hazardous areas & stainless steel for use in areas where the effect of corrosion from humidity can be a problem such as applications in the food processing industry.

Varying pack sizes are offered to give customers a variety of choices, including bulk needle boxes. Standard quantities are offered from stock in packs of 6 needle sets per carton.

CHISEL TIP NEEDLES

These needles will clean the same material as a pointed tip, but will leave light surface marking.

Image	Part Number	Size (mm)	Description
	413.2112	3mm	6 x sets of 12 Needles
	413.2119	3mm	6 x sets of 19 Needles
	413.2128	3mm	6 x sets of 28 Needles

	453.2110	3mm	Box of 100 Needles
	443.2107	3mm	Box of 1000 Needles

FLAT TIP NEEDLES

The flat tip needles will reduce marking on metal surfaces and can actually give a polishing finish.

For use on thin gauge metals and any surface where a light treatment is required.

2mm needle used on a welded joint produces a similar effect to shot peening, reducing stress in the weld.

POINTED TIP NEEDLES

Sharpened to a conical point, these are the most effective in breaking through very hard scale on materials where some surface indentation is permissible - or where a roughening or keying of the surface is actually desirable.
